## 初學者的電腦中文輸入法與電子字典 “Beginner’s Chinese Inputting Method for Computer & Electronic Devices”

“如何讓初學不識中文者能輸入任何中國字”為乾隆 973 輸入法的主要研發目標，現行市面上已有多種電腦中文輸入法，各有其優劣喜好，但都需要先認識中文，否則便毫無用武之地，如中文手寫板是最直接，又最接近中文手稿操作的方式，但使用者如不懂中文，而需畫字，則大失其方便、直接性及準確性。“How to let the beginners who do not know the Chinese are able to input any Chinese characters?” is the main goal of Qian≡Long 973 Inputting Method research. There are a number of input methods for Chinese: Cang-Jie (倉頡), Simplified (簡易), Pinyin (拼音) ... etc. However, if you don't know the Chinese language, these input methods are rather useless. Pen-based input is a more direct Chinese inputting method. This method allows the user to input a Chinese character in the most natural way. It is just like writing script on a piece of paper. If you do not know how to write Chinese and have to draw it, this will not help you at all.
